Ken Kulawiak, CISSP, CISA, CMMC-RP

Senior Manager
Wipfli
Chicago, Illinois

Ken Kulawiak is a senior manager in Wipfli's cybersecurity and technology management practice. He specializes in helping organizations mature their information security posture by reducing risks to a strategic level. To meet the rigorous expectations of customers, regulators and business partners, Ken works with clients to ensure their holistic information security program and risk management practices continue to evolve to ensure confidentiality, integrity and availability of the organizations data. Ken leads a variety of engagements designed to help improve organizations' cybersecurity posture, including virtual CISO, cybersecurity risk assessment, governance risk and compliance reviews, incident response planning and simulation, vulnerability and penetration testing, security audit and control verification. He is a frequent author and speaker on cybersecurity, data governance, risk and security compliance topics. He is a member of the Systems Audit and Controls Association (ISACA) and the International Information System Security Certification Consortium (ISC2). He attended the Keller Graduate School of Management where he earned a master of science degree in information security.
